Multimodal Health Risk Prediction

Patient Health Risk Assessment Result

Input Modalities Used

Medical History

Prediction Summary

Predicted Disease	Heart Disease
Risk Level	High
Model Confidence	31.49%
Next Possible Disease	Diabetes

Major Contributing Factors — SHAP

Feature	Impact	Direction
Glucose	-0.0	decreases
HbA1c	-0.0	decreases
Cholesterol	0.0	decreases
HDL	-0.0	decreases
LDL	0.0	decreases
Triglycerides	-0.0	decreases
Hemoglobin	0.0	decreases
Creatinine	0.0	decreases
WBC	0.0	decreases
Platelets	-0.0	decreases

Current Disease Prevention

Maintain a heart-healthy diet, exercise regularly, avoid smoking, control blood pressure and cholesterol, and attend regular check-ups.

Next Possible Disease Prevention

Maintain a balanced diet, exercise regularly, maintain a healthy weight, monitor blood glucose, and attend regular health check-ups.
